VuturuChandraSekharReddy — VuturuChandraSekharReddy

Professional Summary

Computer Science and Engineering (Artificial Intelligence) student with a strong foundation in Java, Spring Boot, SQL, Data Structures, and Full Stack Development. Experienced in designing, developing, testing, and deploying web applications through academic projects and internships. Passionate about Agile software development, problem solving, and building scalable software solutions while continuously learning new technologies.

Education

B.Tech – Computer Science and Engineering (Artificial Intelligence) Aug 2023 – Present
Madanapalle Institute of Technology & Science CGPA: **8.99/10**

Intermediate (SSE) Jun 2021 – May 2023
Sri Chaitanya Jr. College, Kadapa, Andhra Pradesh **93.6% (Distinction)**

Technical Skills

Programming Languages	: Java, Python, SQL
Frontend	: HTML, CSS, JavaScript, ThymeLeaf
Frameworks	: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate
Databases	: MySQL, MongoDB
Tools & IDEs	: VS Code, Eclipse, Git, GitHub
Core Concepts	: Data Structures, OOP, DBMS, SDLC, Agile Methodology, Problem Solving

Internship Experience

Machine Learning Intern – Inspire Softech Solutions (Remote) Jun 2025 – Aug 2025

- Engineered a Diabetes Prediction System using Python, Scikit-learn, Pandas, and NumPy by preprocessing healthcare data and implementing supervised machine learning algorithms.
- Evaluated and compared 5 machine learning models through feature engineering, hyperparameter tuning, and performance analysis to identify the best-performing classifier.

Projects

Common Tech Stack: Java • Spring Boot • Spring Security • Spring Data JPA • Hibernate • MySQL • REST APIs • Thymeleaf • Git

Placement Portal & Career Portal GitHub Jul 2026

- Developed a full-stack Placement Portal supporting 3 user roles (Student, Company, and Administrator) with secure authentication and role-based access control.
- Implemented 6+ core modules including job posting, applications, resume upload, profile management, and an admin dashboard following MVC architecture and SDLC principles.

Food Rescue Platform GitHub Jul 2026

- Built a full-stack Food Rescue Platform supporting 4 user roles (Admin, Restaurant, NGO, and Volunteer) with secure JWT-based authentication.
- Developed 7+ functional modules including food donation, NGO request handling, volunteer coordination, dashboard analytics, profile management, and feedback management.

Certifications

- Java Foundations — LinkedIn Learning
- Java Data Structures & Algorithms — UnStop
- SQL (Intermediate) — HackerRank
- AWS Cloud Foundations — AWS Academy
- Quantum Fundamentals Program — WISER

Achievements

- Selected for the second round of Smart India Hackathon (SIH) 2025.
- Organized and coordinated technical workshops and college events, collaborating effectively with teams to ensure successful execution.
- Led my team to the finals of a Technical Quiz competition by demonstrating strong technical knowledge, teamwork, and problem-solving skills.
